

Together, we can deliver!

Founded in 1984 and powered by dedicated staff & volunteers, we deliver a comprehensive healthcare solution to seniors over 60 that begins with a meal delivery.

We provide seniors with independence and well-being, as well as the additional benefits of social connections, safety checks, and friendly visits.

Eligibility for all programs will be determined by our Social Work Department through a telephone screening and assessment process.

Five days a week, volunteers help with our activities, which include delivering meals to clients, checking on their well-being, and sharing information on additional programs and services.
